¹ Varies with user weight, terrain type, battery amp-hour (AH), battery charge, battery condition and tyre condition.

² Due to manufacturing tolerances and continual product improvement, this specification can be subject to a variance of (+ or - 3%).

³ AGM or gel cell type required.

⁴ Battery weight may vary based on manufacturer.

⁵ Tested in accordance with ANSI/RESNA, WC Vol2, section 4 & ISO 7176-4 standards. Results derived from theoretical calculations based on battery specifications and drive system performance test conducted at maximum weight capacity.

NOTE: All specifications subject to change without notice.

The information contained herein is correct at the time of publication; due to Pride's commitment to constant improvement and development, we reserve the right to alter specifications without prior notice. Theoretical range is calculated under test conditions in accordance with European standards. Actual range in normal use will depend on many factors, including the condition of the vehicle and its batteries, the weight of the driver, correct tyre pressures, ambient temperature, and the gradient and surface of the road or pavement. Dimensions listed are for power base only. Overall measurements will vary based on seating and accessory selections.
